**Technical Data Sheet**

**KISTOCK WIRELESS DATALOGGER**

**KH210-RF**

Temperature/hygrometry
current/voltage/pulses

---

**KEY POINTS**

- 20,000 measurement points
- IP65
- Visual alarm
- Possibility to turn off the Kistock
- 2 configurable setpoint alarms
- Magnetic mounting
- Supplied with secured wall-mounting bracket

**TECHNICAL FEATURES**

- **Units displayed**: °C, °F, %RH, mV, V, mA, A
- **Resolution**: 0.1 °C, 0.1 °F, 0.1%RH, 0.001 V, 1 mV, 0.1 A, 0.001 mA
- **Universal external inputs**: 1 mini-Din connector for temperature, current, voltage, pulses
- **Internal sensor (KH210-AN-RF/KH210-AO-RF)**: Temperature, humidity, current, voltage, pulses
- **Offset channel (KH210-DO-RF)**: Temperature / hygrometry
- **Setpoints alarms**: 2 setpoint alarms on each channel
  Possibility to send e-mail in case of alarm*
- **Frequency of the measurement**: From 1 s to 24 h
- **Operating temperature**: From -20 to +70 °C
- **Storage temperature**: From -40 to +85 °C
- **Radio span (in free field)**: 300 m
- **Frequency**: 868 MHz
- **Battery life**: 3 years**
- **Data storage**: In the Kistock until downloading on PC

---

*thanks to the Kilog RF software / ** on the basis of 1 measurement each 15 minutes at 20°C

---

**FEATURES OF HOUSING**

- **Dimensions**: 116.5 x 74.4 x 39.8 mm
- **Weight**: 160 g
- **Display**: 2 lines LCD screen
  Screen dimensions: 45 x 28.5 mm
- **Control**: 2 keys: Select and OK
- **Material**: Compatible with food industry environment
  ABS housing
  Sides and caps made of Elastomer
- **Protection**: KH210-AN-RF/KH210-AO-RF: IP65
  (housing)
  KH210-DO-RF: IP65
- **PC communication**: 1 digital input
- **Digital electronics**: Lacquer protected circuit board
  Meets RoHS standards
- **Battery power supply**: Type lithium 3.6 V
- **Visual alarm**: 2 electroluminescent diodes (green and red)
- **Environment**: Air and neutral gases

</table>

1 Internal thermo-hygrometry probe for KH210-RF-A and external for KH210-RF-DO.

*All accuracies indicated in this document were stated in laboratory conditions and can be guaranteed for measurements carried out in the same conditions, or carried out with calibration compensation.

**As per NF X 15-113 standard and the charter 2000/2007 Hygrometers, GAL (Guaranteed Accuracy Limit) which has been calculated with a coverage factor value of 2 is ±2,88%RH between 18 and 28°C on the measuring range from 5 to 95%RH. Sensor drift is less than 1%RH/year.

### TEMPERATURE PROBE (optional)

<table>
<thead>
<tr>
<th>Feature</th>
<th>NTC</th>
</tr>
</thead>
<tbody>
<tr>
<td>Measuring range</td>
<td>From -40 to +120 °C (remove probe)</td>
</tr>
<tr>
<td>Accuracy*</td>

<th>Measuring range</th>
<th>0/4-20 mA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Accuracy*</td>
<td>±0,2 % of measuring ±1 µA</td>
</tr>
</tbody>
</table>

### VOLTAGE INPUT CABLE (optional)

<table>
<thead>
<tr>
<th>Measuring range</th>
<th>0-10 V</th>
</tr>
</thead>
<tbody>
<tr>
<td>Accuracy*</td>
<td>±0,2 % of measuring ±1 mV</td>
</tr>
</tbody>
</table>

### AMMETER CLAMPS (optional)

<table>
<thead>
<tr>
<th>Measuring range</th>
<th>0-50 A / 0-100 A / 0-200 A / 0-600 A</th>
</tr>
</thead>
<tbody>
<tr>
<td>Accuracy*</td>
<td>±1 to 2,5 % of reading value according the range</td>
</tr>
</tbody>
</table>

### PULSES CABLE (optional)

<table>
<thead>
<tr>
<th>Maximum voltage</th>
<th>5 V</th>
</tr>
</thead>
<tbody>
<tr>
<td>Input type</td>
<td>TTL frequency count</td>
</tr>
</tbody>
</table>

*All accuracies indicated in this document were stated in laboratory conditions and can be guaranteed for measurements carried out in the same conditions, or carried out with calibration compensation.

### RECORDER FUNCTION

KISTOCK datalogger is supplied turned off to save battery life. To activate it:
- Press “OK” key for 5 s, green LED “On” blinks.

To turn it off:
- Press “Select” and “OK” keys at the same time for 5 s.
  It is impossible to turn it off during a recording or a data download.
**Five recording modes**

KISTOCK can record in 5 different ways:

- "Immediate" mode records values according a predefined interval.
- "Minimum", "Maximum" and "Average" record automatically the calculation of minimum, maximum or average of measured values during an
interval of recording.
- "Monitoring" mode allows to get an accurate history report during error events to help troubleshooting, without stopping the measurement
logging. To proceed this way, you just have to define:
  - a record interval to be used whilst the readings are beyond the setpoints.
  - a record interval for the values measured during each reading beyond the setpoints.
Furthermore, you can also let your KISTOCK record non-stop ("loop" recording option).

**Two operation modes**:

- Autonomous mode: data download is made wireless through the Kilog RF software.
- Network mode: measurements are stored in the datalogger and sent to the computer at regular intervals (in case of alarm, the information
is directly sent to the computer). So Kistock memory is used as buffer memory and is reset at each sending. In this mode, several Kistocks can
be linked to a computer at the same time.

**Three modes dataset start**

Once your recording mode has been set, you can launch your dataset:

- With a delayed start (with predefined date and time)
- With the software
- With push-button

**Six modes dataset stop**

You can stop your dataset:

- As per a date and time (if it was started the same way)
- As per a period
- As per a predefined number of recording points
- Once the storage capacity is full
- With "Stop" option of the software
- By holding "OK" key for at least 5s, if this function has been previously activated by the software.

---

**SCREEN**

1. **END**
   - **DATASET is finished**
2. **REC**
   - **One value is being recorded**
3. **LOG**
   - **Flashing : dataset has not started yet**
     - **Constant : data set is in progress**
4. **FULL**
   - **Slow flashing : dataset is taking 80-90% of storage capacity**
     - **Fast flashing : dataset is taking 90-100% of storage capacity**
     - **Constant : storage capacity filled up**
5. **Min**, **Max**
   - **Displayed values correspond to maximum and minimum values of the channels**
6. **ACT**
   - **Refresh of displayed measurements**
7. **TIME**
   - **Display of measurement and recording intervals**
8. **MIN**
   - **Low battery indicator**
9. **MAX**
   - **Alarm action type : rising or falling action**

---

**SOFTWARE**

- **Configuration and data processing software**
  
  The new **KILOG RF** software is specially designed for the **KISTOCK-RF** range. In addition to the standard functions of
dataloggers configuration and data processing (average, minimum and maximum values...), it allows the creation of a
wireless dataloggers network (**up to 100 dataloggers**) for a real-time monitoring.
  
  **Ref. : KILOG-RF**

- **Software is compatible with the wired range.**
SOFTWARE (continuation)

- Communication base with KILOG-RF software
  This base allows to communicate by radio frequency with Kistock-RF (kistock by kistock data recovery, programming of Kistock-RF...). It must be continuously powered and connected to the PC for the use of kistock in network mode. It is equipped with a USB connection for PC, a jack connection for programming and downloading wired Kistock and a relay output. Supplied with main adapter, KILOG-RF software and USB cable.
  Ref.: BK-RF

ACCESSORIES

- Data collector.
  KNT data collector allows you to collect measurements from one or several KISTOCK directly on-site (up to 500,000 values stored). Data can be displayed and printed from the KNT or download to your PC.
  Ref. KNT 310

- Alarm relay that can switched from KILOG-RF software via BK-RF base. Supplied with main adapter.
  Ref.: KAL-RF

- Wire extensions for NTC temperature probe.
  Made of PVC HT, 5m long with male and female mini-Din connectors
  Ref.: KRC 5
  Note: you can connect several extensions together (maximum length 25m)
  • Lace. Ref. KDC

- Device to extend radio signal to kistocks (300 m). Supplied with main adapter.
  Ref.: KPR-RF

- Autonomous instrument to check communication. It allows to check signal reception for positioning of dataloggers, extender and alarm box
  Ref.: KTC-RF

SUPPLIED WITH

- Secured wall-mounting bracket
  KIMO has designed a new proprietary anti-theft system with no padlock. Your system cannot be unlock or damaged : your installation is fully secured.

CALIBRATION

KISTOCK dataloggers can be supplied with calibration certificate as an option.

WARRANTY PERIOD

KISTOCK dataloggers have 1-year guarantee for any manufacturing defect (return to our After-Sales Service required).
